## AVIATION OCCURRENCE BULLETIN

**DATE: 28 JUNE, 2019**  
**REPORT # AO18-000012**  
**AIRCRAFT REGISTRATION: C6-VIP**  
**INVESTIGATION STATUS: COMPLETED**

### SUMMARY

Occurrence Bulletins are concise reports that detail the facts surrounding an aviation occurrence, as received in the initial notification and any follow-up enquiries. They provide an opportunity to share safety messages in the absence of a full investigation.

Released as required, the Bulletin provides a summary of the less-complex factual investigation reports conducted by the AAID. The results, based on information supplied by organizations or individuals involved in the occurrence, detail the facts behind the event, as well as any safety actions undertaken. When applicable, the Bulletin also highlights important Safety Messages for the broader aviation community, drawing on earlier AAID investigations and research.

### GENERAL DETAILS

<b>Date and Time of Occurrence:</b>	21 June, 2018, 5:00pm local		
<b>Location</b>	Lynden Pindling Int'l Airport		
<b>Persons on Board</b>	Crew	3	Passengers 16
<b>Injuries:</b>	Crew	0	Passengers 0
<b>Commanders License:</b>	Airline Transport License		
<b>Occurrence category:</b>	SCF-PP Powerplant failure or malfunction		
<b>Occurrence type:</b>	Incident		
<b>Investigation status:</b>	Final Report Complete		

### AIRCRAFT DETAILS

Aircraft details	
<b>Aircraft Type and Registration:</b>	Saab SF-340, C6-VIP
<b>Year of Manufacture &amp; Serial #:</b>	340-098
<b>Number and Type of Engine(s)</b>	2
<b>Type of operation:</b>	Commercial
<b>Information Source:</b>	AAID Field Investigation
<b>Nature of Damage:</b>	No damage reported

## **Occurrence Summary:**

On 1<sup>st</sup> June, 2018 at approximately 5:00pm local, a Saab SF-340 aircraft, registration C6-VIP operated by Western Air Limited as a schedule commercial operator, secured an engine inflight due to high temperatures reading.

The flight with 3 crew and 16 passengers landed safely without incidence or any injuries. The pilot stated that approximately 25 miles from the Lynden Pindling International Airport he observed a substantial temperature fluctuations in the right engine that led him to secure the engine from possible engine damage. The aircraft departed South Bimini. The weather at the time was visual meteorological conditions and was not a factor in the incident. A limited scope investigation was conducted and no safety messages or recommendations warranted.

---

*This Occurrence Bulletin contains facts which have been determined up to the time of issue. It is published to inform the aviation industry and the public of the general circumstances of accidents and serious incidents and should be regarded as tentative and subject to alteration or correction if additional evidence becomes available.*

*All AAID investigations are conducted in accordance with Annex 13 to the ICAO Convention on International Civil Aviation, and The Civil Aviation (Investigation of Air Accidents and Incidents) Regulations 2017. The sole objective of the investigation of an accident or incident under these Regulations is the prevention of future accidents and incidents. It is not the purpose of such an investigation to apportion blame or liability. Accordingly, it is inappropriate that AAID reports should be used to assign fault or blame or determine liability, since neither the investigation nor the reporting process has been undertaken for that purpose.*
